

LegitURL Report

Generated on 2025-06-03T17:36:23Z
Version: 1.1.2 / Build: 20250603.0

This report uses heuristics.
A low score does not imply the URL is malicious, only that it lacks strong security hygiene.
This analysis is based on clean HTTP requests, made **without query parameters or fragments**, to simulate a first-time access.

 - [SUSPICIOUS] Inline JS dominates 69% of the HTML content. This suggests heavy client-side scripting. Modern frontend frameworks often inline JS, but excessive use can impact clarity, security, and maintainability.
 - [INFO] Script density is 0.064 script per 1000 bytes. This may be typical of apps using moderate scripting.
 - [INFO] Suspicious JS function: console.log(...) detected inline 2 time(s).
 - [SUSPICIOUS] Suspicious JS function: XMLHttpRequest(...) detected inline 2 time(s).
 - [SUSPICIOUS] Suspicious JS function: location.replace(...) detected inline 1 time(s).
